Corpo Europeu de Solidariedade

Funded by
the European Union

WHAT

This program accelerates the shift to a better world by exploring regenerative methods, sparking creativity, and empowering participants to create meaningful solutions. Through collaboration and hands-on learning, young people develop resilient strategies for tackling climate challenges and driving positive change.

The Participants will be involved in activities such as:

- intro sessions of Permaculture
- Agroforestry
- Permaculture Design
- Whole Systems Thinking
- water management

OBJECTIVES

- Train communities to become more resilient facing climate change●
- Develop examples of sustainable development and to use them as examples for education
- share know-how with larger audiences by creating multimedia content on sustainable development
- Fortify the international consortium
- involve youngsters with less opportunities
- sharing and intercultural dialogue through non-formal education

WHERE

QUINTA DAS RELVAS

is the hosting organisation where residents will have their activities, located in Branca, Portugal.

The Farm has a rich natural heritage where several flora and fauna species live. They work daily to promote and develop non formal activities, focus on the artistic and eco-sustainable areas.

Its main goal is to train and educate people on artistic and eco-sustainability topics, spreading the message to their families, friends and local communities.

The farm is a lab, where we test new solutions for a more fairer and greener world.
